

MOOC PhD and Career Development

Teaser

The MOOC PhD and Career Development is now available in english. Translation has been done for PhDOOC contents. It is possible to participate in english in the forum but activities are not yet translated in english. Some external materials are in english, french one are not translated.

THE AIMS OF THIS MOOC

PhDs offer access to a multitude of careers, but many PhD candidates do not know where to find out about them. They feel isolated and struggle to find the time to prepare their future. There are, however, an increasing number of initiatives designed to help guide PhD graduates.

Our PhDOOC association offers PhD candidates and graduates a MOOC designed to familiarize them with the tools and resources available online. This tailor-made collaborative initiative allows them to draw on the support of a community whilst taking into account their limited time and availability.

Our aim is to create a space for discussing and finding information on post-doctoral careers. We hope that this MOOC will help **create a community** focused on sharing, collaboration and peer support.

THE SKILLS YOU WILL DEVELOP

This MOOC will enable you to:

- build your skills portfolio;
- identify possible careers for after your PhD;
- develop your career plan;
- build your own communication tools;
- establish your own approach to job searching;
- grow your network by joining a community of learners.

THE COURSE PATHWAYS

For this third season, two training pathways are available:

Access to both the "core" and "advanced" training pathway is free of charge. **There is no need to choose** which pathway to follow at the start of the MOOC. It will all depend on the activities you choose as the course goes on. It is up to you to set a specific objective.

- **The "core" training pathway** requires roughly two hours' work per week. This course is assessed through quizzes and group activities.
- **The "advanced" training pathway** requires roughly four hours' work per week. In addition to the core program, you will need to complete two peer assessments to pass the course.

In each unit, additional resources are available to help you further develop your skills.

PEDAGOGICAL FEATURES

MOOC stands for "**Massive Open Online Course**", it is a fully online, free course with unlimited participation and open access, available for a limited time only. Students learn autonomously via educational activities and resources. The participants form a community of learners. They help each other and can interact with the teaching teams via the forums.

There are various types of MOOC. We have chosen to use the sMOOC - or **social MOOC** - model, from the connectivist, or cMOOC, family. This means that learners are encouraged to add to the educational content and there is a significant focus on collaborative activities and discussion.

TARGET AUDIENCE AND ENTRY REQUIREMENTS

This MOOC is primarily aimed at:

- PhD candidates in all fields:
- PhD graduates who are looking for work or are already employed.

It may also be of interest to:

- organizations, institutes and anyone working with PhD students and graduates;
- businesses, especially recruiters;
- the general public - anyone who wants to find out more about PhDs!

The course requires access to a device connected to the Internet and a basic level of IT skills.

THE TEACHING TEAM

PhDOOC is an association, constituted under the French law of 1901, whose aim is to train and support PhD candidates and graduates, and enable the creation of a community. To do this, we have launched the first MOOC in France on career orientation for PhD graduates in all fields. Our aim is to create a space dedicated to information, discussion and mutual assistance on this subject. The association currently has five voluntary members, who design and manage the MOOC.

THE CERTIFICATE OF ACHIEVEMENT

For a fee, a certificate of achievement can be obtained for either course. The certificate will state which course has been taken (core or advanced), as well as the number of hours of training completed (12 or 24 hours). This will enable you to gain recognition for your work (it is up to participants to do this themselves). A fee is charged for this certificate, which enables the association to continue to operate and offer access to the MOOC free-of-charge.

There are two ways to obtain this certificate:

- PhD candidates at the [USPC](#) University, the Grenoble Alpes University, The [Montpellier University Doctoral College](#), the [ComUE PSL](#), the [University of Angers](#), the University of [Orléans \(Edifice Project\)](#), the University of [Léonard de Vinci](#), the [Languedoc-Roussillon University Doctoral College](#) and the [Aix-Marseille University](#) should sign up via their university website by clicking

on the corresponding link. **NB.** You will need to use the same email address to sign up to both the MOOC platform and your university website.

- For everyone else, once you have signed up to the MOOC platform, you can pay for your certificate **at any time** on the [PhDOOC HelloAsso page. by clicking here](#). **NB.** You will need to use the same email address used to sign up to the MOOC platform to make the payment on HelloAsso.

SPECIALISTS INVITED TO SPEAK AT WEBINARS

[ABG - L'intelli'agence](#)

ABG is an association under the French law of 1901 designed to connect PhD students and businesses. It is an international leader in the provision of information, support and employment to PhD graduates.

[Adoc Talent Management](#)

Adoc Talent Management is the first company to specialize in PhD graduate career management, and centers its activities on recruitment advice, training, and Innovation & Research.

[APEC](#)

The APEC is a joint association that supports and advises executives throughout their career, as well as young higher education graduates.

VOLUNTEERS

In previous seasons participants have helped improve the MOOC and contributed to its development. We are extremely grateful to all those who provided their assistance and skills to this project.

SPONSORS AND SUPPORT

[ADUM \(Accès Doctorat Unique et Mutualisé\)](#) is an online information, services and communications portal for PhD students and graduates. It offers access to the skills profiles of PhD candidates, graduates and researchers in all fields. For businesses, it is an easy-to-access, online recruitment ground, hosting profiles certified by the 78 PhD establishments and 136 PhD universities in its network. [The ADUM](#) is an initiative of the association [Contact](#)

Support of Universities

[L'Université de Bordeaux](#)

Organizations that helped develop the project

[L'université Sorbonne Nouvelle, Paris 3](#), le projet Européen ECO, [l'université Bordeaux Montaigne](#), [PhDTalent](#), [les Poulets Bicyclettes](#), [l'Andès Toulouse](#), [University Côte d'Azur](#)

They communicate:

AWARDS

This project was awarded the [Open Education Awards for Excellence 2019](#) from the Open Education Consortium and the Prix PEPS 2017 award by the French Ministry of Higher Education, Research and Innovation, in the category "Educational Innovation".
